FOR IMMEDIATE RELEASE

54 New Energy-Efficient Snowguns to Blanket Hunter Mountain for 2011/12
Energy-efficient HKD SV10 Impulse snowguns to replace older pin guns

Hunter, NY – Hunter Mountain will be installing an additional 54 energy-efficient HKD SV10 Impulse snowguns arriving for winter 2011/12. These snowguns will replace older pin guns and add to the 150 new guns that were purchased last year. The new guns will further increase Hunter’s ability to make more snow and recover more quickly from inclement weather with far less reliance on energy.

These additional acquisitions are part of Hunter’s ongoing commitment to the environment and to lowering its power consumption, while still providing the best snowmaking in the world. The snowguns will be spread through K-27, Claire’s Way, Westway, and others. The snowguns join the ranks of Hunter’s 2011/12 improvements on the West Side, including a high speed quad, the Zephyr Express.

“We continue to buy new guns each year,” explains Bruce Transue, who oversees Hunter’s snowmaking operations. “We are constantly working to continue our energy efficiency plan.” Further information about the HKD SV10 Impulse guns, as well as a video of a gun in operation, is available at www.snowgun.com: click “Snowmaking Products”, then “SV10 Impulse.”

Hunter, once known as the “Snowmaking Capital of the World,” maintains its reputation as having one of the most powerful snowmaking arsenals...as well as some of the fastest recovery times in the East. For further information about the new HKD guns at Hunter Mountain, please e-mail jpezak@huntermtn.com or call 800-486-8376 x2339. Tours of Hunter’s snowmaking shop and operations are available to members of the media throughout the winter; please call or e-mail to schedule.
